

Monthly Eyesight Flights

MERCY AIR 

Limpopo

Every second Saturday, each month
our Kodiak collects a team of
volunteer eye doctors and nurses from
Johannesburg...

... to fly them to Thohoyandou in Limpopo Province to conduct cataract surgeries in the local hospital

... a full day of driving becomes a 1.5 hour flight

As there is no eye specialist in the district, the waiting list of patients is steadily increasing

Statistically in South Africa, patients diagnosed with blindness die within 5 years.

This woman was divorced after she lost her eyesight as she couldn't take care of her family anymore...

We are proud to assist our partners, Flying for Life, and the local hospital to serve the rural communities of Limpopo

This is why we do this...

In one day...

...the doctors can conduct:

- **15-20 eye surgeries**

This means not only

- **Restoring the Sight of 15-20 blind people**

...but also impacting their lives and those of their families

Monthly Eyesight Flights **MERCY** **AIR**

Thank you **Donors** for your generous support!

And thank you to our **Partners:**
Flying for Life and Donald Fraser Hospital
